

**MATERIALS CONTROL  
LABORATORY MANUAL**

**Section:** App. 56  
**Issued:** 12/15/69  
**Revision #:** AC  
**Revised Date:** 11/07/22  
**Page 1 of 13**

**WARNING**

This document is the property of Pratt & Whitney (P&W), a division of Raytheon Technologies Corporation, and contains confidential and / or proprietary information. You may not possess, use, copy or disclose this document or any information in it, for any purpose, including without limitation to design, manufacture, or repair parts, or obtain FAA or other government approval to do so, without

encompasses both Pratt & Whitney Canada (PW North) and Pratt & Whitney US (PW South).

- 3.2 **Semi-quantitative Spectrographic Analysis** The Determination of a material's chemistry to detect the presence of the alloying elements to a degree by which a positive identification can be made as to the alloy type, as well as the ability to distinguish between similar alloys.
- 3.3 **Quantitative Spectrographic Analysis** P&W defines quantitative spectrographic

### 3.4 Wet Chemical Analysis

of metallic component to identify alloys. This is not process solution analysis.

### 3.5 Optical Emission Spectroscopy (OES)

OES is defined as testing which utilizes actively Coupled Plasma), DCP (Direct Current Plasma) and DR (Direct

## 4. PROCEDURE:

4.1 The commercial laboratories listed in [Table I](#) have been reviewed by Pratt & Whitney-
